 We make every effort to provide businesses with the best option.

We Provide:

Backup As A Services (BaaS):

The First Unique Backup As A Service (BaaS) in the World with BYOS. Backup services for workstations, servers, O365, and G-Suite (local, private, and public clouds)

Backup Services for workstations, servers, Office 365, and G-Suite

Disaster Recovery As A Service (DRaaS):

A pioneer in BCDR provides local infrastructure and private cloud DRaaS in the UAE.

IT As a Service (ITaaS):

Remote desktop administration
Unlimited Endpoints Management with Cloud-based Centralized Dashboard for Remote Monitoring

Security As a Service: (SaaS)

Safeguard Your Activities, Digital Assets, and Endpoints. Managed Detection & Response (MDR) with global security analysts monitoring it around-the-clock. With a cloud-based central dashboard, your network, including WFH users, can protect your endpoints.

Infrastructure As a Service: (IaaS)

With modern DC, outsource your server workloads. Server, Storage, Network, and Software are available at Fujairah e-Gov as needed.
