onQloud Remote Connect

Datasheet

Why Remote Connect?

A strong tool for connecting securely to computers, servers, and online services.

-  **Unlimited endpoints**
-  **Centralized management**
-  **Secure connection**

Connecting From and To:

Connect **FROM**: Windows 7/8/10, Windows Server 2008/2012/2016, Windows Server 2880/2012 R2, macOS 10.8 or newer, iOS, Android
 Connect **TO**: Windows 7/8/10, Windows Server 2008/2012/2016, Windows Server 2008/2012 R2

FEATURES

-  **Unlimited Endpoints and Connections**
Connect to as many endpoints as you want without any restrictions.
-  **Management Portal**
Through a single web-console, monitor, control, and oversee all of your remote connections.
-  **Advanced Security**
With encryption, 2FA, improved ID and PIN verification, and "brute-force" protection, you can feel secure.
-  **Unattended Access**
At any time, you can connect to and command dependable computers anywhere in the world.
-  **Easy Deployment**
Using a pre-configured build and silent installation, download, install, and automatically configure remote desktop on endpoints
-  **Reporting**
Find out who on your team has run the session, what endpoint they connected to, and for how long, according to detailed statistics.
